

chapter VII- colors

colors

Apart from metallic colors, **HYDRONIC ALTERNATIVES** offers a wide range of RAL colors.

Your guarantee of quality and durability.
The radiators carry a 5-year guarantee covering both leaks and paint-work.

The radiators are made of the best materials and carefully checked before they leave the factory. Every appliance is fully automatically laser welded without visible welds. In contrast to the high-gloss finishing of chromium-plated radiators, the stainless steel radiators are brushed to give a matt finish.

Lacquered radiators are first degreased, phosphated, rinsed with demineralized water, primed using electrophoresis (KTL-bath) and then dried at 200°C. Finally, the radiator is painted with an electrostatic powder coating with epoxy polyester and enamelled at 230° C.

The result is a high quality product - a synthesis of good design, excellent materials and advanced technology.

colors

Please add \$300.00 for color option per radiator

For in-stock Integral radiators, leadtime is an average of 2-weeks.
Special order Integral, Plainor and New Lotus are 8 to 10 weeks.

Colors shown are representative, not the actual color as it will appear on the radiator.

For color samples please order RAL Color Book page V-6
